

The Alicia Prone Stander

The **Alicia Prone Stander** is designed to be easy to use and not take up a lot of space while providing comfortable upright positioning for young children. The child is always at the lowest possible position while the stander is adjusted up or down to fit their height. The combination of adjustments and supports as well as the options of the **Posterior Pelvic Support Gate**, and the **Back and Head Support Extensions** provide the child with whatever amount of help they need to experience weight bearing in a standing position.

OPTIONS

- Available in three sizes: **(APS1) (APS2) (APS3)**
- Posterior Pelvic Support Gate (PPSG)** Height and depth adjustable hinged gate provides firm posterior support and makes transfers easier for caregivers
- Inset Activity Box (ACTBX)** Inset plastic tub for tray with clear plastic cover
- Back Support Extension (BKSE1)** Flat pad extends above posterior gate up to 9"
- Back and Head Support Extension (BKSE2)**

FEATURES

- Stander adjusts from 90° to 60°
- Tray is height and angle adjustable
- Basic stander includes four lateral supports, two 2" straps, contoured knee supports, shoe holders, tray, and locking casters
